

Absolute Manage Web Admin (AM Web Admin) is a web-based application used to manage mobile devices and computers enrolled on the Absolute Manage Server (AM Server). This document contains information on changes made to AM Web Admin since the previously released version.

For information and instructions on installing the latest version of AM Web Admin or upgrading your current installation, see *Installing and Upgrading Absolute Manage Web Admin*.

New Features and Changes in AM Web Admin 1.7

In addition to bug fixes, AM Web Admin 1.7 includes the following new and updated functionality:

- The Web Admin Configuration Tool, which includes the ability to register new AM Servers with AM Web Admin and configure other settings. For more information, see https://help.absolute.com/amconfig/1_7/en/
- Compatibility with Absolute Manage Server versions 6.9

Contacting Global Support

If you have difficulty upgrading Absolute Manage or any of its components, please contact Absolute Software Global Support. We welcome your questions, comments, and feature requests. Please visit us at www.absolute.com/support and follow the instructions on the page to contact technical support in your region.
